

2025 – Lab Exam 03 Report

Student ID	It23647428
Batch	WD 6.1
Marking Guide	
1. Functionality: How well the core and bonus features are implemented	3
2. Creativity & User Interface Design: Clean and intuitive UI/UX design	2
3. Code-Quality & Organization: Code is well-organized & documented	2
4. Advanced Features & Data Persistence: Usage of SharedPreferences with one of the advanced features	3
Total Marks	10
Evaluator	

Description:

HealthMate is an Android wellness app developed using **Kotlin** and **Android Studio** to help users maintain a healthy daily lifestyle. The app includes three main features: a **Daily Habit Tracker** to add, edit, and mark daily routines like drinking water or exercising; a **Mood Journal** with emoji selection to log emotional states with date and time; and a **Hydration Reminder** that sends notifications using **AlarmManager** to encourage regular water intake.

User data such as habits, moods, and settings are stored locally using **SharedPreferences**, ensuring information is saved across sessions without the need for a database. HealthMate also includes an **advanced feature**-a simple **mood trend chart** (using MPAndroidChart)- that visually displays mood patterns over time.

The app features a clean, user-friendly, and responsive interface that adapts to different screen sizes and orientations. Overall, **HealthMate** serves as a personal wellness companion, encouraging users to build positive habits, stay mindful, and improve their overall well-being.
